Job description:**Backend Developer****Company Description**

Client is redefining how financial services companies run their workflows through the power of agentic finance. Their platform empowers leading asset managers and hedge funds to automate complex processes, uncover hidden alpha, and manage risk. With their award-winning portfolio and risk management system, portfolio managers gain the ability to automate their work and uncover hidden risks and alpha with precision that was previously unattainable.

Client brings deep expertise in AI, machine learning, and quantitative finance, with PhDs and MBAs from institutions such as Wharton. Headquartered in Boston with an engineering hub in Rome, client partners with globally recognized asset managers across the U.S., U.K., Europe, Asia, and Australia. They are proudly backed by top investors including Coinbase Ventures and Bain Capital Ventures.

Role Description

This is a full-time hybrid role for a Back-End Developer based in Boston, MA, with some flexibility for remote work. The Back-End Developer will be responsible for designing, implementing, and maintaining server-side logic, ensuring high performance and responsiveness to requests from the front-end. Daily tasks include developing back-end components and integrating user-facing elements developed by front-end developers, managing and optimizing databases, and collaborating with team members to enhance overall system architecture and technologies.

Qualifications

- Strong Backend Web Development and Software Development skills
- Proficiency in Object-Oriented Programming (OOP)
- Proficiency in Python and at least one other programming language
- Experience with Backend tech stack:
 - FastAPI, SQLAlchemy, Pydantic (Python)
 - SQL, PostgreSQL
 - Shell scripting for Linux, Terraform
 - AWS, CI/CD
- Experience with API design: GraphQL, REST
- Excellent problem-solving abilities and attention to detail
- Experience with database management and design
- Knowledge of AI or ML applications in financial technology is a plus
- Good communication and collaboration skills
- Ability to work under pressure
- Bachelor's degree in Computer Science, Engineering, or related field
- Ability to work 3+ days per week from our Boston office and occasionally travel to our HQ in Rome, Italy
- Strong ambition and work ethic: results-oriented, driven, no 9-5 mentality
- Desire to work with our team for at least 1-2 years
- Embracing of our values

Benefits

- Competitive compensation commensurate with skills
- Equity / Stock options
- Health, dental, and vision insurance
- Flexible time off
- Fast-growth career opportunity
- Fun and dynamic work environment
- Great 360 learning opportunities in software development, finance, AI
- Working for a fast-growing US-based startup funded by leading VCs industry

NOTE: PLEASE CONFIRM

Regards,
Peter Hodge
Group Manager - Business Development
